DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: there is not descriptions for figure 56 which describes the claimed invention.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is not clearly stated on lines 7, 8 what is meant by "sending an indicator" and "receiving said indicator".

Claim 2 is rejected because it depends on claim 1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-4 are rejected under 102(a) as being anticipated by Latif et al. (Pat. 6,393,483 B1).

In claims 1-4, Latif et al. discloses, in Fig.3, a switch 140 transmitting packets (first packets) from MAC1 (first source) via port 1 (ingress port/ first port) to a host A. When the port 1 is failed (indication) , packet transmission from different source (second packets) is reassigned (switching indicator) to be transmitted to an active port 3 (third port/ second ingress port) or any least busiest port in a round robin technique (third port/ second ingress port). See Figures 3, 4 and 8 & col.6, lines 47-67.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Johnson (Pat. 6301257 B1) discloses Method and Apparatus for transmitting data Frames between Switches in a Meshed data Network.

Hamami (Pat. 5,959,972) discloses Method of Port /link Redundancy in an ATM Switch.

Morales (Pat. 5,987,526) discloses ATM Layer Automatic Protection Switching Mechanism for ATM PVCs.
